Introducing Locklift-Deploy

A new gem in the Broxus developer toolkit has just arrived. Read all about it on page 2.

MDAO x EVER Staking: What's Going On?

The first phase of the partnership with MarsDAO is coming to its culmination. Learn where we are now and what's going to happen next.

Broxus Giveaway Results

The recent Broxus giveaway has finished, and we are thrilled to announce the winners!

## Macroeconomy Highlights Of The Week

- FOMC press conference: keywords analysis
- A number of Parisian banks searched on suspicion of tax fraud
- Four-year cycle in graph form
- Big deposit outflow in the U.S.
- Silicon Valley Bank stock delisting

Social Boost

In the past couple of months, the Everscale team has applied an intense effort to boost the network's social media presence. The results speak for themselves:

- Twitter followers grew by 43%
- Reach for posts has gone from 82k to 285k
- Number of Discord members has doubled and reached 10.5k
- Everscale website visits have increased fivefold compared to Feb

The Broxus Times

Introducing Locklift-Deploy — Game-Changer For Everscale Developers

Locklift, a key part of the Broxus catalog of developer tools (T-Sol, Locklift, Nekoton, etc), has added a new Locklift-Deploy plugin!
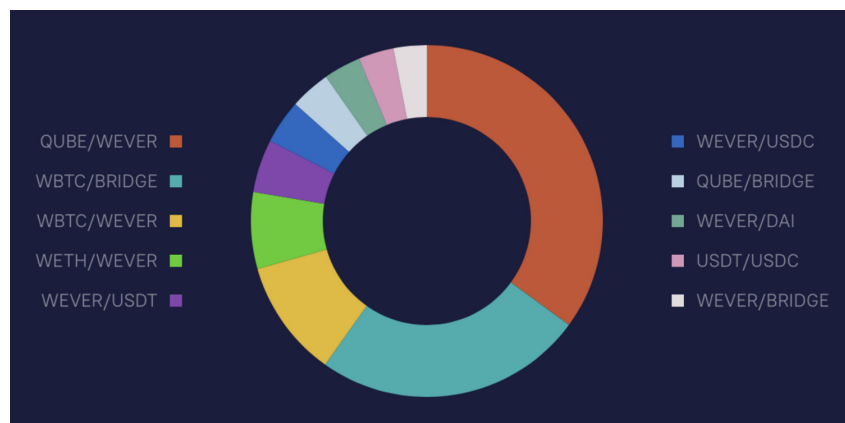

The plugin allows you to better configure the testing environment and easily write and operate smart contract deployments, migrations and fixtures.

With this tool you can:

— Write fixtures to deploy environments for testing.

— Deploy and share testing artifacts across your tests.

— Easily write complex deployment procedures by storing deployment artifacts between calls to different scripts.

— Simplify your deployment management in general.

Not only has writing smart contracts on TVM become easier thanks to the T-Sol plugin for JetBrains IDEs, but deploying and testing them has become easier as well thanks to Locklift.

FlatQube DAO: Epoch 12 results

Pools will get the same percentage of the total reward as they got from the total vote.

Epoch 12 has ended on FlatQube DAO, and the next Epoch's farming rewards have been determined. The voting was held using veQUBE, the FlatQube asset designed for DAO votes, which you can get by locking in QUBE, FlatQube's utility token.

Total votes, veQUBE: 87,979

Total rewards, QUBE: 42,350

DEV DIGEST

— The Octus Bridge team has finished smart-contracts development for the Everscale-Bitcoin bridge.

— EverWallet now has support for a new in-page provider.

— FlatQube affiliate system is approaching the production stage.

— Locklift-deploy plugin released.

— First iteration of the stEVER dashboard is in testing stage.

— Nekoton-Python has been updated.

NON-DEV DIGEST

— Broxus Giveaway has finished.

— Updated designs for EVER Wallet: search by address, UI kit, seeds and accounts management.

— Design of additional charts for stEVER dashboard.

— Preparation of OG tags for EVER Scan.

— Start of Ledger app audit.

StEVER In Figures

Snapshot of stEVER for W13:

- TVL: 124M EVER
- APY: 6.1%
- 1 stEVER ≈ 1.04 EVER
- 48 depools in the system
- 289 stakeholders

Did you know?

When users unstake stEVER, they get more EVER than they previously staked. This is because the collateral of stEVER is constantly increased by the returns from validation.

MDAO x EVER Staking: What's Going On?

Following the recently announced launch of partner staking with MDAO, here are some figures reflecting the program's current status.

Pool	TVL (MDAO)
EVER	**6,485,786** ▼6.3%
Users, total	Users, active
720 ▲4.8%	**684** ▲1.9%
Daily income	APY
0.05%	**16.92%**

Besides staking, next week MarsDAO will commence a series of educational posts on the Everscale ecosystem for its community.

Broxus Giveaway is over!

The Broxus Giveaway has come to an end and the program brought in new active members to our community and saw many participants get rewarded with nice prizes.

Winner name	Points	Prize
Awesome_bae	494	QUBE (50 USD)
Scooter Ice	473	QUBE (50 USD)
A dreamer	466	QUBE (50 USD)
RosKids	214	QUBE (50 USD)
Maria Katashova	158	QUBE (50 USD)
Asem	151	QUBE (50 USD)
Mahdis Haray	151	QUBE (50 USD)
Journal-ok	151	QUBE (50 USD)
NTRNT_EVER	123	QUBE (50 USD)
riana#6950	123	QUBE (50 USD)

To participate in the event, the users needed to subscribe to Broxus social media accounts. As a result, the number of subscribers has increased by over 30%.

Watch Out For Broxie Scammers!

Recently, scammers have been orchestrating phishing attempts targeted at Broxie holders. Be on the lookout, and always verify Broxies via the Provenance records!
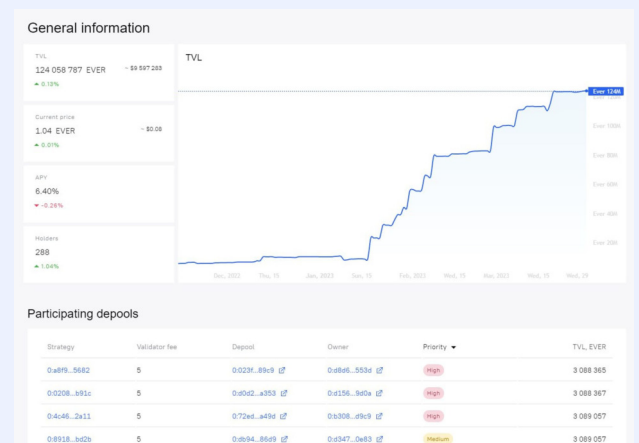

Sneak-Peek Corner

Broxus developers are always busy building new products and features, yet it takes some time for them to fully launch.

From time to time, we will let you have a look behind the curtains of upcoming releases, even if even if they are still works-in-progress.
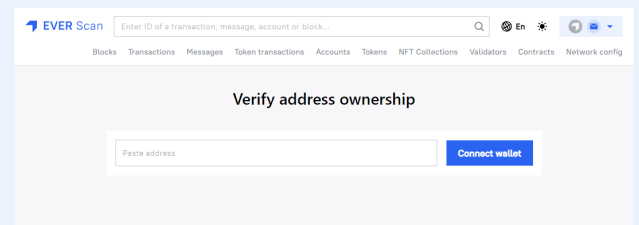

STEVER DASHBOARD

Liquid staking, thanks to its UI simplicity and convenience, has become very popular among Everscale stakeholders. However, there are a lot of things happening in the background. With the upcoming release of the stEVER dashboard, you'll get an inside look at all its details.

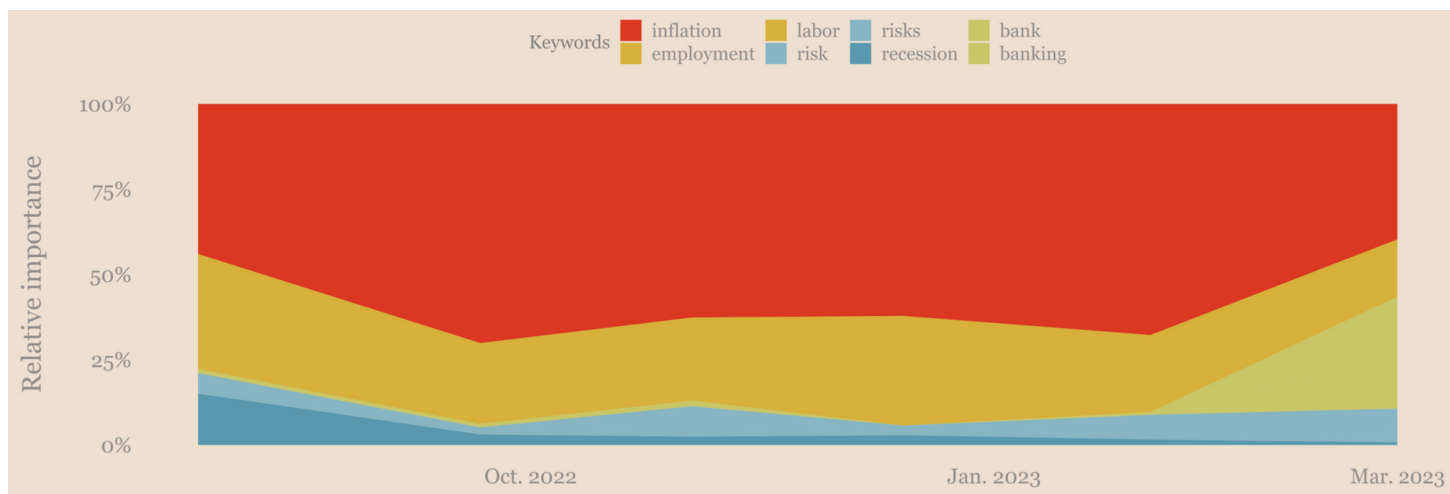

ASSETS MANAGEMENT ON EVER SCAN

With this upcoming release, token owners will be able to prove their ownership and provide the token manifest. This small yet significant step towards token list decentralization will let ordinary users avoid mistakes and losses with DEX operations, and Everscale projects to build trust with their communities.
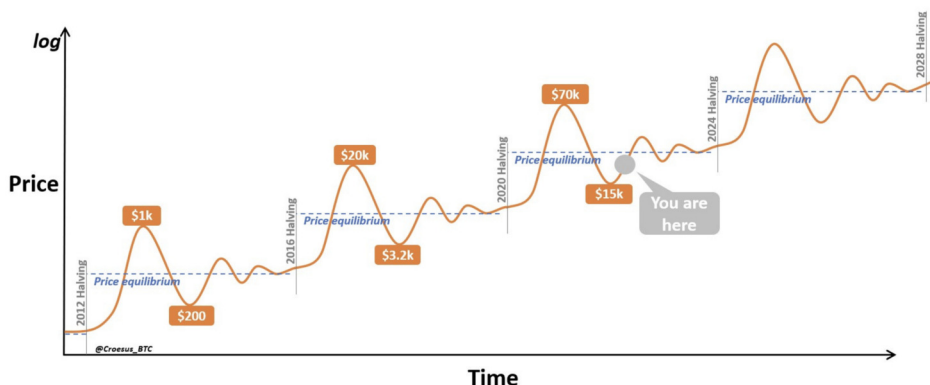

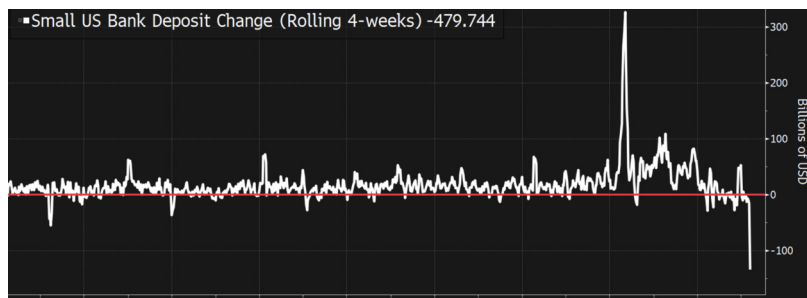

FOMC Press Conference: Keywords Analysis

Ecoinometrics analyzed the frequency at which keywords have appeared in the press conferences of the Federal Open Market Committee over the past six months. While the last meeting was primarily focused on the banking crisis, inflation has been the committee's central concern.

Four-Year Cycle In Graph Form

Jesse Meyers has conceptualized the 4-year market cycle as a model with a logarithmic vertical axis, in which the price fluctuates around some equilibrium level determined by the market and tends to decrease on halving dates.

Big Deposit Outflow In The U.S.

Small U.S. banks last week experienced their largest deposit outflow since 2007, to the tune of $133 billion. This money has been flowing into the largest banks and hedge funds.

Parisian Banks Searched On Suspicion Of Tax Fraud

Authorities raided five banks in Paris on suspicion of tax fraud. According to a statement from France's National Prosecutor's Office of Finance, the raids were carried out as part of five preliminary investigations launched in December 2021 on charges of money laundering and dividend fraud. French media outlets have reported that HSBC, BNP Paribas, Exane - a subsidiary of BNP, Societe Generale and Natixis were all searched.
